Dear Friends of Give Ye Them to Eat:

We thank God for your lives and your mission work and your love for GYTTE.

We had a week-long intermediate health course from Sept. 17th to the 23rd at the Tree of Life Training Center.

There were 33 topics but I won't name them all! Pictures are really more helpful than words so I will just name a few.

The women learned to inject as it is common for doctors to give a prescription for this.

They learned about First Aid including vital signs,

CPR, treating burns,

poisoning, how

to deal with fractures; bites, stings, rabies and tetanus.

They had classes on many diseases like cold and flu, tuberculosis, intestinal obstruction, appendicitis, peritonitis and colitis.

Also diseases that tend to be tropical in nature like Hepatitis A, Scabies, Lice, Malaria and Dengue.

They learned how to treat and prevent lead poisoning. And finally the topic of Gender Equity helps the women increase their self-esteem and avoid violent relationships.

Along with classes, the women do short group dramas to reinforce the learning.

Your donations made this course possible – thank you so very much!

In Christ, Nan, Miguel, Clara, Cata and the health team of Betza and Panchita
